

NEHA VARDHINI J K

Backend Developer | Python · FastAPI · REST APIs · SQL

+91 8122978440 | jknehavardhini2004@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Backend Developer with 7 months of production internship experience building enterprise REST APIs in C#/.NET, plus two independently deployed FastAPI + PostgreSQL applications and three additional Python/ML projects shipped to production. At Ambattur Fashion Group, delivered 30–40 REST API endpoints across 9 Master modules for a Financial Accounting System used across 4 countries. Delivered 60+ production and personal-project API endpoints to date, with hands-on experience in relational database modeling across PostgreSQL, SQL Server, and MySQL.

TECHNICAL SKILLS

Languages: Python, C#
Frameworks & Libraries: FastAPI, .NET, REST API Development
Databases: SQL Server, MySQL, PostgreSQL
Tools & Platforms: GitHub, VS Code, Vercel, Render, Streamlit Cloud, IoT
AI/ML: Machine Learning, Random Forest, Llama 3.1(LLM)
Soft Skills: Cross-location team coordination (4-country deployment), sprint-based delivery under 60–70-day timelines, multilingual (Telugu — Native, Tamil, English — Professional)

PROFESSIONAL EXPERIENCE

Ambattur Fashion Group Pvt. Ltd · Software Engineer Trainee (.NET Backend Developer) Nov 2025 – May 2026

Chennai, Tamil Nadu · Internship · On-site | Stack: C# · .NET · SQL Server · REST APIs · Azure Repos

- Contributed to a production Financial Accounting System serving 100+ departments across 4+ international locations — Chennai, Sri Lanka, Bangladesh, and Jordan
- Built 9 of 18 Master modules end-to-end in C#/.NET, delivering 30–40 REST API endpoints integrated with SQL Server across 18+ tables, as part of a 4-member team shipping 10+ endpoints within a 60–70-day sprint cycle
- Maintained a consistent Azure Repos contribution cadence of ~3 PRs/day (~150 PRs total) across the internship, supporting daily Dev-branch integration and peer-review workflows for on-time endpoint delivery

NCS SoftSolutions Pvt. Ltd · Intern – AI & ML Development May 2025 – Jun 2025

Chennai, Tamil Nadu · Internship · On-site | Stack: Python · Machine Learning · Neural Networks

- Integrated 5 HuggingFace model APIs into Python backend scripts, handling request formatting, model selection, and structured output parsing across the inference pipeline
- Built OCR-to-classification data pipelines connecting document text extraction to downstream ML workflows

LIVE PROJECTS

Campus Placement Intelligence System

React.js · FastAPI · PostgreSQL (Neon) · Vercel · Render

Live Demo: [Live ↗](#)

- Designed and deployed 29 REST API endpoints across 5 PostgreSQL database models, covering student, company, and admin workflows
- Validated end-to-end CRUD and recommendation workflows against 40+ student and 15+ company test records
- Engineered a rule-based weighted eligibility engine evaluating CGPA thresholds, skill matches, and department compatibility to filter and rank job recommendations for students

StockVault — Full Stack Product Management App

JavaScript · Full Stack · Vercel

Live Demo: [Live ↗](#)

- Built a full-stack product management application in React, FastAPI, and PostgreSQL, implementing CRUD operations across 4 REST endpoints.

PDF AI Chatbot

Python, Streamlit, Groq API, and Llama 3.1

Live Demo: [Live ↗](#)

- Built a Python-based PDF Q&A assistant using direct LLM context injection (non-RAG architecture), tested across 20+ documents up to 100+ pages with average response times of 2–5 seconds

PolluCast — Real-Time AQI Predictor

Python · Random Forest · IoT · Streamlit

Live Demo: [Live ↗](#)

- Built an IoT-enabled air quality monitoring system using NodeMCU sensors and a Random Forest model, trained on 3,194 records with 90–95% accuracy, delivering real-time AQI forecasting

Face Recognition Attendance System

Python · OpenCV · KNN · Streamlit

Live Demo: [Live ↗](#)

- Developed a facial recognition attendance system using Python, Streamlit, OpenCV Haar Cascade, and K-Nearest Neighbors (KNN) to automate user registration, face recognition, and attendance tracking.
- Built a training pipeline that generates a KNN model from registered face images, performs real-time identity prediction, prevents duplicate attendance entries, and exports attendance records through an interactive dashboard.

EDUCATION

M.Sc. Computer Science — Loyola College, Chennai · Completed **Jul 2024 – Apr 2026**
University of Madras · CGPA: 9.35/10 · Secretary, Computer Research Clusters (CRC) Club 2024–25

B.Sc. Computer Science — Bhaktavatsalam Memorial College for Women · Completed **Jul 2021 – May 2024**
University of Madras · CGPA: 8.4/10 · Presented research paper at NAC24 National Conference

HSC & SSLC — Nazareth Matriculation Hr. Sec. School, Chennai · Completed **May 2021**
Mathematics & Computer Science

AWARDS & ACCOMPLISHMENTS

- Learn Python for Data Science — Infosys Springboard Certification (Nov 2025)
- AWS Academy Graduate Cloud Foundation Course — Amazon Academy Graduate (Oct 2025)
- Secretary — Computer Research Clusters (CRC) Club, Loyola College, Chennai (2024–25)
- Research Paper Presented — 'Humanoid Voice Recognition' at the National Conference on Advanced Computing (NAC24), Bhaktavatsalam Memorial College for Women(Feb 2024)
